

Productivity Toolkit

*All products are now compatible with Esri's ArcGIS Desktop 10.5

Parcel Administrator 4.5

New Features

- Parcel Admin Listener window contains the Parcel Admin toolbar and function just like the main toolbar.
- Parcel Admin Listener User Interface has been enhanced
- Parcel layer visibility and selectability can be managed from the Parcel Admin Listener UI
- Enhanced map selection that allows for multiple parcels to be returned and selected in max granularity folder.

Fixed

- Map unlink and map select did not respect layer visibility and selectability
- Parcel Admin Configuration allowed invalid connections for linked views
- Tasks configured to re-use parents did not add the parent as a child.
- Unlinking parcels from the map did not work properly in certain scenarios
- Select parcel from the map throws an error when the parcel numbers are stored as a formatted parcel number.
